Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9, 11-21, and 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwarzler in view of Hyde et al.

Schwarzler discloses a control assembly to control a paraglider having rotatable load bearing rollers and rotatable flaring strand rollers with respective straps (see figures 1-11), controller, and a latching mechanism and transmission unit (see figures 12-16). Schwarzler is silent on the use of the laser altimeter to know the distance between the ground and the paraglider. However, Hyde et al teaches that laser altimeters are well known in the art.

It would have been obvious to one skilled in the art to have used laser altimeter in Schwarzler's system as taught by Hyde et al to know when the flare the paraglider for a safe landing.

Allowable Subject Matter

Claims 10, 22, and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hetzer et al, Riley et al, Ewing, Rectenwald, Houdou, Cummings, Nasca, Smith, and French '705 disclose parachute means.
